

BEWARE: MORAL PANIC UNDERWAY!

We live in a highly polarized society. In such an environment, some agenda driven groups often exploit horrific events creating public panic to further their cause.

You might hear about the Child Safety First report that was issued by the Center for Judicial Excellence (CJE).

An international group of researchers discovered that the non peer-reviewed CJE report, *Child Safety First*, contains more than 50 citations that are misquoted, misrepresented or are patently false. Further, the CJE report is filled with flawed research methodology primarily based upon anecdotal accounts. Our 80-page analysis of *Child Safety First* reveals:

- The CJE has ignored and/or misrepresented the scientific status and research regarding parental alienation (an insidious form of child abuse, intimate partner violence, and coercive control).
- The CJE policy recommendations exceed the scope of their data.
- The CJE has made recommendations that are not supported by science and literature.
- The CJE report attempts to influence American jurisprudence:
 - The judiciary (mandating judges' training, limiting judicial discretion)
 - The social sciences (qualifications for witnesses, implementation of treatments)
 - Rights of families (children's right to have a relationship with two healthy parents, parents' rights to rear their children)
- We believe that the CJE is attempting to silence any opinions that disagree with their agenda, including the parental alienation community.

Recommendations from *Child Safety First* should be viewed with extreme skepticism. This blatant misinformation can and will escalate unless the CJE and other domestic violence advocates who promote this deception acknowledge that their agenda fails to include all forms of abuse.

The CJE is hosting a Congressional Briefing about the *Child Safety First* report in Washington DC on Wednesday, October 25th. The event is called from 11 AM to 12 noon at the Rayburn House Office Building, Room 2044. Public policy makers, the media and the public must be aware and concerned about this outrageous public policy deception.
